EPDs within the same product category but from different programs may not be comparable. EPDs of construction products may not be comparable if they do not comply with EN 15804. For further information about comparability, see EN 15804 and ISO 14025.

#### **Company information**

Owner of the EPD: Tarkett
Contact: Sandy Bentmim (sandy.bentmim@tarkett.com)
Description of the organisation:

With an international coverage and a wide range of products, Tarkett has over 130 years of experience in providing integrated solutions for floorings to professionals and end users. Many of the most important architectural firms in the world and building professionals have chosen Tarkett for the value of its products and for its consultation and service abilities. Therefore, Tarkett floorings and sport surfaces are present in several prestigious architectural reference points. Tarkett offers integrated solutions for floorings, able to meet the particular needs of customers. Our wide range of designs, colours and models provides an infinite series of possibilities, contributing to create a positive environment and a better quality of life for people.

Tarkett operates with the utmost respect for the environment towards the realization of eco-friendly products.

Tarkett's commitment to the environment is woven throughout its business. Cradle-to-Cradle principles are, in fact, the basis of the design and production of every solution. Particularly, the lifecycle analysis is used to continuously improve the production process, and so the products until their use stage, disposal and recycling. The development of products that can be reused within internal production cycles, or external ones in case of other individuals, has been an integral part of the business strategy aimed at sustainability for many years. The WCM (World Class Manufacturing) management system has been developed in 2009, and it includes the environmental pillar aimed to the elimination of losses and to the growth of process efficiency.

<u>Product-related or management system-related certifications:</u> ISO 14001, ISO 45001, WCM manufacturing site

Name and location of production site(s): Dendermonde (Belgium) and Waalwijk (Netherlands)

#### **Product information**

Product name: DESSO Desert EcoBase

<u>Product identification:</u> Carpet tile with a 100% recyclable DESSO EcoBase<sup>®1</sup> backing and solution

dyed PA6 yarn

Product description: Loose-lay carpet tiles (EN 1307) with DESSO EcoBase® backing developed by

Tarkett. The service lifetime recommended by Tarkett is 10 years

UN CPC code: 2223Z

<sup>&</sup>lt;sup>1</sup> Assured by Lloyds Register

#### LCA information

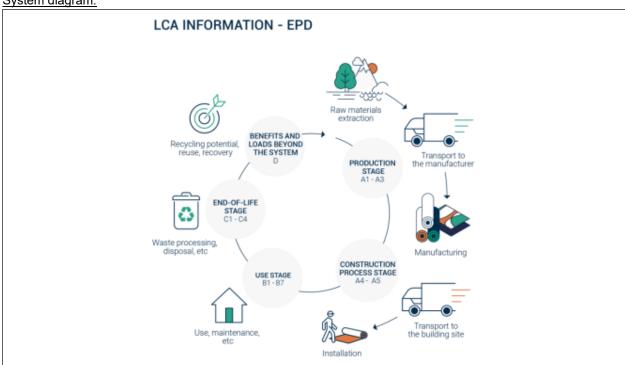

<u>Functional unit / declared unit:</u> 1m<sup>2</sup> of floor covering with a reference service life (RSL) of 1 year for specified characteristics application and use areas according to ISO 1307 and EN ISO 10874.

Reference service life: 1 year Time representativeness: 2021

Database(s) and LCA software used: Ecoinvent 3.6, Simapro 9.1

Description of system boundaries: Cradle to grave and module D (A + B + C + D)

#### System diagram:

<u>More information:</u> The products are classified in accordance with EN ISO 10874, (previously EN 685) and in reference to the FCSS (Floor Covering Standard Symbols) to be used in all professional areas which require class 33 or less.

| EcoBase (w. recycled chalk) | 57                              | 80                               | 0                            |  |  |  |  |
| Packaging materials         | Weight, kg                      | Weight-% (versus the product)    |                              |  |  |  |  |
| Cardboard box               | 1.09E-01                        | 3                                |                              |  |  |  |  |
| Wooden pallet               | 1.00E-01                        | 2                                |                              |  |  |  |  |

<sup>\*</sup> The yarn is manufactured from 75% pre-consumer materials.

#### **Material Health**

DESSO Desert EcoBase is C2C-Silver certified.

Raw materials are assessed against 'Material Health' criteria as defined by the C2C product certification standard v3.1 and the C2C Material Health Assessment methodology (see www.c2ccertified.org).

#### Recycled content (third-party verified)

DESSO Desert EcoBase contains 57.9% recycled content. The product is delivered with the Cradle to Cradle® Gold-certified DESSO EcoBase® backing, which is 100% recyclable2 and designed with 100% positively defined<sup>3</sup> ingredients, including chalk upcycled from the Dutch drinking water industry, as the raw material in our DESSO EcoBase carpet backing.

<sup>&</sup>lt;sup>2</sup> Assured by Lloyds Register

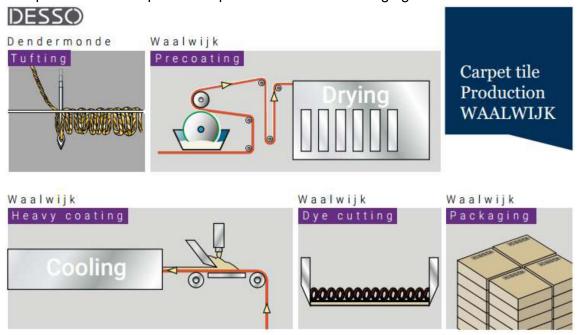

<sup>&</sup>lt;sup>3</sup> Positively defined means all ingredients have been assessed as either Green (optimal) or Yellow (tolerable) according to the Cradle to Cradle® assessment criteria. As described in Cradle to Cradle® Certified Product Standard Version 3.1

# **Product manufacturing**

#### **Production process**

The production of carpet tiles is presented in the following figure:

#### Renewable energy

Our carpet tiles are produced with energy from 100% renewable sources. The electricity is coming from renewable sources with Guarantees of Origin.

#### **Production waste**

| Waste type   | DESSO Desert EcoBase |
|--|----------------------|
| Non-hazardous waste to<br>incineration in the<br>cement industry [kg/m²] | 2.23E-01             |
| Non-hazardous wastewater<br>to external<br>treatment [kg/m²]             | 2.04E-02             |

# **Delivery and installation**

#### **Delivery**

The average distribution distance between the factories and the installation site is presented in the following table. The distribution is made by truck.

|                                   | DESSO Desert EcoBase |
|-----------------------------------|----------------------|
| Average distance of delivery [km] | 7.00E+02             |

PAGE 7/13

#### Installation

Carpet flooring do not use any electric tools for their installation. If a cut is necessary, it could be done with a manual tool.

#### Waste

During the installation approximately 3% of the flooring is lost as off-cuts. All flooring losses are sent to incineration

#### **Packaging**

50% of the packaging materials goes to incineration and 50% goes to landfill except for wooden pallet which are recycled.

# **Use Stage**

#### Reference Service Life (RSL)

For this product, the stated RSL is 1 year. It should be noted, however, that the service life of a carpet flooring may vary depending on the amount and nature of floor traffic and the type and frequency of maintenance. The manufacturer has provided this service life on the basis of his experience of flooring manufacture and supply. This RSL is applicable as long as the product use complies with that defined by ISO 14041 and ISO 10874 in accordance with the product's classification. The service lifetime recommended by Tarkett is 10 years.

#### Cleaning and maintenance

The maintenance step concerns the cleaning of the floor. Tarkett has provided the recommended maintenance routine for the product throughout the reference life. Water, detergent and electricity consumption of the cleaning machine are considered in the LCA study:

Common maintenance: 2 times / weekPeriodical maintenance: 2 times / year

| Description             | Amount   | Unit        |  |  |  |  |  |
|-------------------------|----------|-------------|--|--|--|--|--|
| Electricity consumption | 4.42E-01 | kWh/year/m² |  |  |  |  |  |
| Water consumption       | 5.70E-02 | L/year/m²   |  |  |  |  |  |
| Detergent consumption   | 3.00E-03 | L/year/m²   |  |  |  |  |  |

#### Prevention of structural damage

To avoid excessive wear, usage should be restricted to the stated areas of application as outlined by the norm ISO 10874.

#### **End of Life**

Tarkett has implemented a take-back and recycling program called ReStart. Via Tarkett's Sales Network and with the help of logistic partners, post-use carpet tiles are collected and returned to Tarkett's carpet recycling centre in Waalwijk, the Netherlands. DESSO's EcoBase products have been designed with disassembly and recycling in mind, which allows for recovery of yarn and backing materials in a closed-cycle and without loss of quality. 100% of all materials in PA6 carpet tiles with EcoBase backing can be recycled.<sup>4</sup> The recycling process<sup>5</sup> is developed by Tarkett and unique in the market.

#### **Transport**

Carpets are recycled in the same factory where they are produced. So, the distance of transport between installation sites and recycling site is the same as for the module A4 (average delivery distance to customer).

|  | DESSO Desert EcoBase |
|--|----------------------|
| Transport distance to Tarkett's carpet recycling centre [km] | 7.00E+02             |

#### Waste processing

Basically, the process separates yarn and EcoBase® backing and makes these main material streams available for the next carpet cycle, without loss of value and/or material properties (closed-loop recycling).

A small rest stream (mainly tuftcloth and SBR-compound) cannot be reused yet at the desired quality level. At this moment in time those streams will be considered as fuels and raw material (chalk and ATH) for the cement industry, until other outlets will be found.

# Resource recovery

Module D has been considered for this study in order to evaluate the possible environmental benefits obtainable through the re-use of secondary materials in other production cycles. Particularly, the module clearly describes the benefits and the environmental charges deriving from reusable products exiting from the system, such as secondary materials or secondary fuels.

Three outlets have been considered:

- Yarn
- DESSO EcoBase<sup>®</sup> backing
- · Others compounds

PA6 yarn will be sent back to Tarkett's yarn supplier Aquafil for depolymerization and reuse in new carpet yarns. This post-use material stream can be used for 100% and without quality loss for the production of new carpet yarns.

<sup>&</sup>lt;sup>4</sup> On average 75% is recycled in a closed-loop and the remaining 25% as co-production in the cement industry, with small variances per collection.

<sup>&</sup>lt;sup>5</sup> Recyclability has been verified by Lloyds Register.

DESSO EcoBase<sup>®</sup> backing is 100% recyclable in Tarkett's own production process. Post-use material can be directly recovered in Tarkett's production for the same purpose and avoids the production and use of primary material.

A small rest fraction is recycled in the cement industry. The chalk and ATH content substitutes primary chalk, which is a raw material for the production of cement. Organic residues substitute primary fuel for processing.

# Interpretation of results

The environmental impact of DESSO EcoBase products should be considered over the whole life cycle and beyond, including all module A-D. DESSO EcoBase consists of a novel recipe, specially designed to enable post-consumer recycling on a high level, which means, for the same purpose and without quality loss.

The new recipe was introduced in 2011. Because of the relatively long service life-time (10 years), the majority of current products are still in their first cycle, meaning that recycled content is still very minimal and not included in the calculations.

# **Environmental Information**

# Potential environmental impact

|                              | Results per functional or declared unit - End of Life → Recycling |                  |                 |   |                    |                    |                   |   |                  |                   |                      |                   |                  |                  |                     |           |

# Information on biogenic carbon content

| Results per functional or declared unit |      |                      |
|---|------|----------------------|
| BIOGENIC CARBON CONTENT                 | Unit | QUANTITY             |
|   |      | DESSO Desert EcoBase |
| Biogenic carbon content in product      | kg C | 9.96E-03             |
| Biogenic carbon content in packaging    | kg C | 1.09E-03             |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO<sub>2</sub>.
