SPECIAL ORDER INSTRUCTIONS* OR COMMENTS

*Please send purchase order or any drawing or information specific to this order along with this order form.

Stairnosing detail

QTY AND LENGTH DETAILS – PLEASE READ BEFORE FILLING IN

- If you need any optional extras, please indicate this in the comments box. Optional extras include:
 - Top Step Detail
 - End Cap
 - Mitred Corners
 - LED Lighting
 - Inserts
- If selecting **End Cap or Mitred Corners**, please specify Left-Hand Side (LHS) or Right-Hand Side (RHS) — this is based on looking up from the bottom of the stairs.
- We recommend **adding 100 mm to each nosing** so it can be trimmed on site for a perfect fit.
- If you have any **custom requests**, just add in the comments section below — we're happy to help bring it to life.
- Our top step details are very popular and sometime cause confusion when ordering. If you would like to order multiple nosings, and 1 with a top step detail, you need to indicate this in the details below.

MATERIAL DESCRIPTION

Include board thickness, width and length, supplier and colour.

MATERIAL DELIVERY DATE

COMMENTS OR ADDITIONAL INFORMATION

Return stair nosing

Return nosings provide a seamless finish when the underside of the tread is visible – ideal for floating or large stair flights. They also make a great alternative to a bullnose, offering a modern, squared-off look with all the elegance of a refined edge.

ORDER INFORMATION REQUIRED:

Top Face Dimension (A) – mm		Return Face Dimension (C) – mm	
Front Face Dimension (B) – mm		Tongue or Groove on Top Face	
Qty and lengths of nosings required			

Single Sided Expansion

Similar in appearance to our Edge Cap, this profile is rebated on one side to allow for movement—making it the ideal choice when finishing edges on floating floor installations. Perfect for open edges, balustrades and level transitions where flexibility is key.

ORDER INFORMATION REQUIRED:

Top Face Dimension (A) – mm	
Qty and lengths of nosings required	

Double Sided Expansion

This profile features a rebate on both edges, making it ideal for situations where expansion is required on both sides. Commonly used as a doorway trim or between rooms, it allows each floor section to move independently while maintaining a neat, low-profile finish.

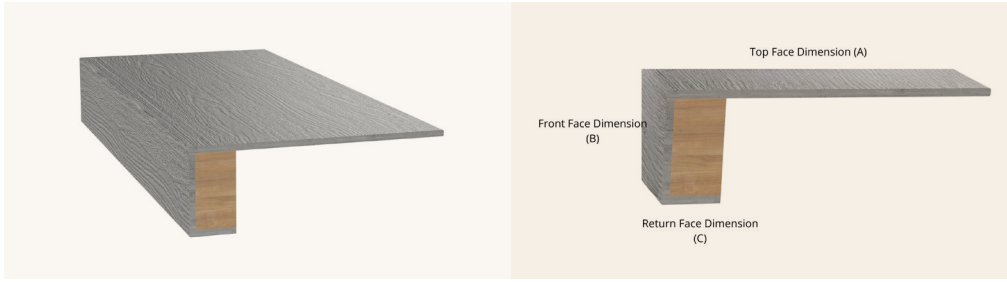

ORDER INFORMATION REQUIRED:

Top Face Dimension (A) – mm	
Qty and lengths of nosings required	

*Return
stair nosing*

Return nosings returns the nosing up the riser for a neat, finished edge – ideal where walls or stringers meet the tread.

ORDER INFORMATION REQUIRED:

Top Face Dimension (A) - mm		Return Face Dimension (C) - mm	
Front Face Dimension (B) - mm			
Qty and lengths of nosings required
