

Technical Data Sheet

Product: DT032

THE EDGE
ON SAFETY

DESCRIPTION

Floor finishing trim strip designed for carpet to concrete or wooden floor height transitions. This is the curved profile of DT031. This profile is designed to be curved and is available in natural satin. Suitable for interior or exterior use, this profile provides a clean finish and carpet transition.

MATERIAL

T6 6063 Alloy aluminium - Available in Mill Finish or Natural Satin anodised.

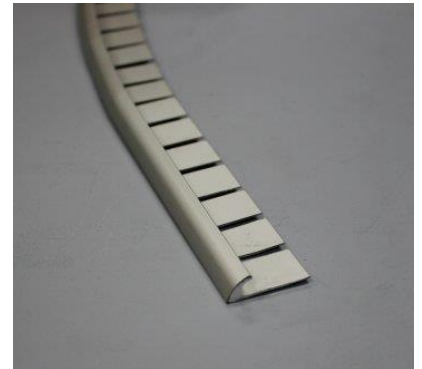

Standard 2.5 Meter Lengths.

DIMENSIONS

EXAMPLE

In this example the difference between DT031 and DT032 can be clearly seen. DT032 is fabricated slightly differently to allow the trim to be contoured on site to match a contoured floor within its specification details.

For PDF and CAD drawings with full dimensions and installation guides, please refer to our website www.tredsafe.co.nz

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
