

Technical Data Sheet

Product: DT068

THE EDGE
ON SAFETY

DESCRIPTION

This wall to floor finishing is designed for use as a packer where 1.5mm wall vinyl meets 2mm floor vinyl. This profile makes vinyl flush for seam welding.

MATERIAL

Rigid Black PVC.

Supplied in 25 Meter Coils.

DIMENSIONS

EXAMPLE

In this example, DT068 has been used with 1.5mm wall vinyl and 2mm floor vinyl. The profile has made the vinyl flush and has been seam welded together.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
