CARPET TILES

Grounded in natural movement

Reminiscent of the Earth’s wind-blown sand dunes and weathered plains, the DESSO Grain carpet tile collection captures nature’s delicate rhythm within its organic surface. Drawing on these natural landforms, a restyled palette of earth-inspired colourways brings the power of nature indoors to create a natural presence.

Made with 100% recyclable yarn and EcoBase® backing, DESSO Grain supports Tarkett’s ongoing commitment to protect the planet’s fragile natural resources.

Shape the interior landscape

Just like grasses shifting in a gentle breeze, DESSO Grain features a structured, organic surface.

Each tile combines high and low loop piles to reflect nature’s irregularity, adding depth and rhythm while serving as a flexible tool for shaping modern interior landscapes.

The restorative power of nature

Fluid and contemporary, Grain introduces a biophilic presence into conscious spaces for work.

Reflecting the absence of hard lines in nature, its textured surface supports quiet flow across open-plan spaces, while softening smaller areas – easing rigid lines and defining spatial functions in offices, educational environments and multi-functional spaces.

Colourways reflecting the natural world

Grounded and tactile, Grain’s 18 nature-inspired colourways reflect the varied tones found across natural landforms.

Spanning soft, sandy neutrals to deeper, clay-like reds, different shades can be combined to define hybrid spaces or zones for focused work – while evoking the qualities of the natural landscape.

Beauty of circularity

At Tarkett, our approach to circularity focuses on three key areas: design, materials and circular journey. For us, the beauty of circularity is about the beauty of the reused materials that go into our products, the innovative manufacturing processes we implement, and the knowledge that we're actively cutting down on waste and greenhouse gas emissions.

DESSO EcoBase®

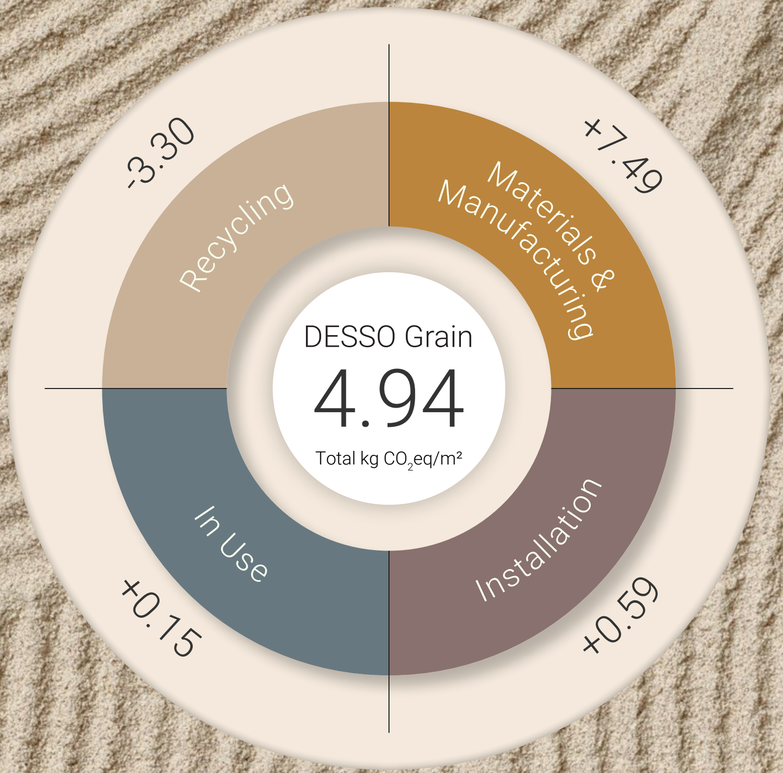

Over a decade ago we made a commitment to place circularity at the core of our ambitions as a company. Our carpet tiles are composed of two key components – yarn and EcoBase® backing – that come together just as neatly as they can later be taken apart.

Circular carbon footprint by Tarkett

To keep track of the carbon generated and saved over a product's life cycle, we calculate the Circular Carbon Footprint of our carpets. Using independently verified data from the relevant Environmental Product Declaration (EPD), we aim to foster dialogue about the importance of circularity and the future carbon benefits that effective recycling can deliver.

Together with our holistic design approach and carefully considered materials, our closed-loop system enables our carpet tiles to record an impressively low circular carbon footprint – one we're continually working, alongside our partners and customers, to shrink even further.

Circular Carbon Footprint: based on Environmental Product Declaration (EPD) EPD-IES-0033450 DESSO Grain externally verified by Bureau Veritas. Based on the carbon footprint (Modules A-D), where Module D represents the future recycling potential with a closed loop recycling scenario, facilitated through Tarkett's Restart® recycling and take-back program.
